

# Light On! Tail Light

## USER MANUAL

- This Light On! Tail Light system is a Dynamo powered LED Tail Light that is intended to be used with the Light On! DynoLight.
- This Light On! Tail Light system must only be connected to the DC connector (identified with the red band) on a Light On! Dynolight. Do not connect this Tail Light directly to the dynamo. Please refer to the DynoLight Users Manual.
- This Light On! Tail Light system is not intended for use with batteries.
- Stand light operates at partial brightness for several minutes after you stop moving.
- Although the Light On! Tail Light is waterproof, do not clean with a spray hose. Clean the lens with soapy water and a soft tooth brush. Rinse gently with water.
- Never look directly into this high power light.
- Dimensions: ½ inch tall, ¾ inch diameter.
- The Light On! Tail Light output is 15 lumens (or 4,500 microcandela) at 10 mph.
- Warning, when mounting with a screw. Do not use a screw that is too long. Driving a screw too deep, past the point that it bottoms out, will damage the body and possibly the electronics.

### Warranty

Light On! LLC provides a two year limited warranty on all components. If a problem occurs in normal use and no alterations or abuse to the product have been determined to have taken place, we will repair or replace that component. Please contact LIGHT ON! LLC for return authorization. You will need to provide contact information, date of purchase, and description of issue.
